MIT APP INVENTOR

MIT App Inventor is an incredible web application that helps users build interesting Android applications. It is a block-based programming tool through which users can create fully functional apps for Android devices such as smartphones, tablets e.tc.

Step 1:

   # Open MIT App inventor in browser.

   # Click create apps in the website.

Step 2:

  # Create user interface from the MIT App Inventor

  # Various components are used to design the app and give a look and feel appearance.
